

Hartford Is Broken and Our State Is Broke.

Career politicians have spent decades voting their interests and those of their friends.

Connecticut's challenges did not appear magically over the past eight years...they are 20 years (and MORE) in the making. A record of partisan voting 96% of the time (2017) – and over many years, 98% – missed votes, votes to increase debt, votes taken that knowingly underfunded pensions; all have caught up with us – and caught up with John Frey.

Ridgefield won't do better without better representation.

I will work for all of Ridgefield, not just for my party. I will not make State Representative my career; it will be my mission.
